A SELECTION OF TWEETS

So if I spend my time eating cheese, watching Netflix, and having orgasms alone, I'm "depressed", but if someone else is there I'm "in love" ?

I'd totally go back to church if they changed up the communion wafers to be Bugles served off the priest's fingertips.

How do I show off my recent weight loss to new dates? I'm thinking of printing up a giant "before" picture and then bursting through it...

I don't wear a lot of makeup because I don't date guys who make enough money to earn a better version of my face.
